

RBE Quick-Release Couplings for Lab Equipment

GET CONNECTED ...

Modular Quick-Release Couplings

Designed for applications in all industrial sectors, research and development, laboratories and universities, for an easy connection to all plumbing services such as circuits of gas, air, vacuum, nitrogen...

Large range

The RBE quick-release coupling comes in 5 sizes to meet your flow requirement:

- 3 mm
- 6 mm
- 8 mm
- 11 mm
- 19 mm

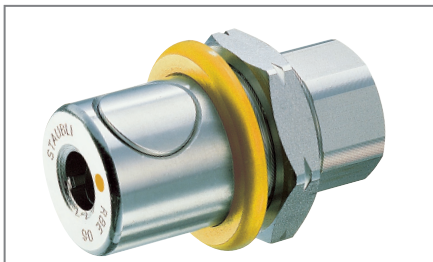

Fully automatic and ergonomic

Connection and disconnection is a one-handed operation:

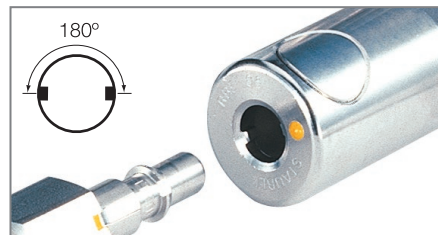

- Connection by pushing the plug into the socket.
- Disconnection by simply pressing on the push button.

Panel mounted version

A very professional integration into your lab equipment.

Foolproof circuit identification

- Prevents any errors in connection between various gas and fluid circuits,
- Permits a clear identification of circuits.

7 safety keys

	Yellow	180°	
	Violet	165°	
	Red	150°	
	Green	135°	
	Blue	120°	
	Brown	105°	
	Black	90°

... to quickly adjust your space to your research

3 shut-off systems to choose from

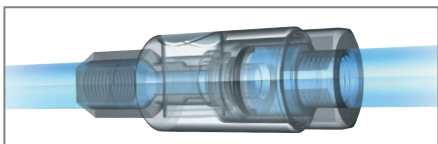

- Single shut-off

- Double shut-off

- Unvalved

Select the valving system required for your application.

Proven reliability

The robust technology of the Stäubli range of couplings gives a long service life at a very low operating cost.

Raised push button

Recommended when wearing safety gloves.

Numerous end-connections

according to the type of circuit:

- Copper tube,
- Stainless steel tubing,
- Rubber hose,
- Plastic hose,
- Male or female thread
- Clamp.

For more than 50 years, Stäubli continues to be one of the world's leading designers and manufacturers of quick-release couplings...

Non-spill Design

Dedicated Profile for Breathing Air applications
